AMENDMENTS TO THE CLAIMS

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A digital distribution method ~~for transmitting digital contents representing an entity of a product over a network and, subsequently, delivering the product, said digital distribution method~~ comprising the steps of:

~~in response to receiving an order for the a product; selected by a buyer over a network;~~

~~_____ incorporating the digital contents representing content of the product into a control program controlling the digital contents;~~

~~_____ and transmitting the control program to a computer over the network, thereby allowing access to the digital contents; and~~

~~sending the product to an address specified by the buyer so that the product arrives at the address after before a predetermined period has elapsed after the transmission; and~~

~~wherein the control program erases the digital contents or erases the control program including the digital contents disabling the digital contents by said control program after when a contents availability period has elapsed, said contents availability period being set to a time longer than the predetermined period, thereby terminating the use of the digital contents.~~

2. (Currently Amended) The digital distribution method according to claim 1 wherein said control program is transmitted with the digital contents incorporated in such a way that only the control program may process the digital contents and, when the transmission of said control program is completed, the control program starts a time measuring operation of the contents availability period.

3. (Cancelled)

4. (Original) The digital distribution method according to claim 1 wherein the product includes various books and documents, music CDs, and video DVDs.

5. (Currently amended) A digital distribution method ~~for transmitting digital contents representing an entity of a product over a network and, subsequently, delivering the product,~~ said digital distribution method comprising the steps of:

~~providing, by a product vendor,~~ a plurality of products for browsing over the network;
~~receiving a selection selecting,~~ by a product buyer, ~~of~~ a desired product from a plurality of browsed products, ~~specifying and~~ a desired delivery period for a delivery of the product, ~~and ;~~

~~receiving placing an order by the buyer~~ for the product over the network;
~~incorporating, by the vendor,~~ the digital contents representing content of the product into a control program controlling the digital contents;
~~and transmitting the control program to a computer the buyer over the network,~~
thereby allowing access to the digital contents via the computer in response to the order, ~~said digital contents representing the entity of the product ordered by the buyer; and~~
sending delivering the product from the vendor to an address specified by the buyer so that the product arrives at the address within when the desired delivery period, wherein the desired delivery period corresponds to a predetermined time has elapsed from a time the order is received placed; and

wherein the control program erases the digital contents or the control program including the digital contents disabling, by said control program, the digital contents when a contents availability period has elapsed, said contents availability period being set in said control program and set to a time being longer than the desired delivery period, thereby terminating the use of the digital contents.

9. (Currently amended) A digital distribution method ~~for transmitting digital contents representing an entity of a product over a network and, subsequently, delivering the product, said digital distribution method comprising the steps of:~~

~~providing, by a product vendor, a plurality of products for browsing over the network;~~
~~receiving a selection selecting, by a product buyer, of a desired product from a plurality of browsed products, specifying and a shipping charge for a delivery of the product, and ;~~

~~receiving placing an order, by the buyer, for the product over the network;~~
~~incorporating, by the vendor, the digital contents representing content of the product into a control program controlling the digital contents and ;~~

~~transmitting the control program to a computer the buyer over the network, thereby allowing access to the digital contents via the computer in response to the order, said digital contents representing the entity of the product ordered by the buyer; and~~

~~sending delivering the product from the vendor to an address specified by the buyer so that the product arrives at the address when a required delivery period has elapsed from a time the order is placed, said required delivery period being determined based on said shipping charge; and~~

~~wherein the control program erases the digital contents or the control program including the digital contents disabling, by said control program, the digital contents when a contents availability period has elapsed, said contents availability period being set in said control program and set to a time being longer than the required delivery period, thereby terminating the use of the digital contents.~~

10. (Currently Amended) The digital distribution method according to claim 9 wherein said control program is transmitted with the digital contents incorporated in such a way that only the control program may process the digital contents and, when the

13. (Currently amended) A digital distribution system comprising a network, a server connected to the network and installed in a product vendor side, and a client computer connected to the network and installed in a product buyer side,

wherein said server comprises:

web pages comprising an item browsing page allowing a product buyer to browse a plurality of products over the network for selecting a desired product therefrom and a product order page allowing the product buyer to specify, over the network, a desired delivery period or a shipping charge for a delivery of the selected product and allowing the product buyer to place an order for the selected product;

digital contents saving means for saving therein digital contents representing ~~an entity~~ content of each product item;

control program saving means for saving therein a control program which is transmitted with a contents availability period set and the digital contents incorporated at digital contents transmission time, the digital contents representing ~~an entity~~ content of the selected product, wherein the control program ~~disables~~ erases the digital contents when the contents availability period expires after the transmission, said contents availability period being longer than the desired delivery period or ~~than~~ a required delivery period determined based on the shipping charge;

transmission control means for controlling the transmission of the digital contents, said transmission control means calling the control program from said control program saving means in response to the order from the buyer and incorporating the digital contents, which is read from said digital contents saving means, into said control program for transmission to the buyer over said network; and

delivery control means for controlling the delivery of the product, said delivery control means delivering the product from the vendor to the buyer when the desired delivery period or the required delivery period has elapsed from the transmission.

14. (Currently amended) A digital distribution system comprising a network, a server connected to the network and installed in a product vendor side, and a client computer connected to the network and installed in a product buyer side,

wherein said client computer comprises:

a browser allowing web pages prepared in said server to be browsed over the network;

wherein the web pages displayed on a screen of said client computer by said browser comprises:

an item browsing page allowing a product buyer to browse a plurality of products and prompting the product buyer to select a desired product therefrom; and

a product order page allowing the product buyer to specify a desired delivery period or a shipping charge for a delivery of the selected product and prompting the product buyer to place an order,

wherein digital contents representing content of the ordered product are incorporated into a control program controlling the digital contents in response to the order, transmitted from the vendor to the buyer over the network, and displayed on the screen of said client computer by said browser, ~~said digital contents representing an entity of the product ordered by the buyer, and~~

wherein, ~~after the desired delivery period or a required delivery period determined based on the shipping charge has elapsed since the transmission and the product is delivered from the vendor to the buyer, said control program stops displaying~~ erases said digital contents ~~on the screen of the client computer when the a contents availability period set in said control program has elapsed, the contents availability period being longer than the desired delivery period or a required delivery period determined based on the shipping charge.~~

15. (Currently amended) A digital distribution system comprising a network, a server connected to the network and installed in a product vendor side, and a client computer connected to the network and installed in a product buyer side,

wherein said server comprises:

web pages comprising an item browsing page allowing a product buyer to browse a plurality of products over the network for selecting a desired product therefrom and a product order page allowing the product buyer to specify, over the network, a desired delivery period or a shipping charge for a delivery of the selected product, and allowing the product buyer to place an order for the selected product;

digital contents saving means for saving therein digital contents representing an entity content of each product;

control program saving means for saving therein a control program which is transmitted with a contents availability period set and the digital contents incorporated at digital contents transmission time, the digital contents representing an entity content of the selected product, wherein the control program ~~disables~~ erases the digital contents when the contents availability period expires after the transmission, said contents availability period being longer than the desired delivery period or than a required delivery period determined based on the shipping charge;

transmission control means for controlling the transmission of the digital contents, said transmission control means calling the control program from said control program saving means in response to the order from the buyer and incorporating the digital contents, which is read from said digital contents saving means, into said control program for transmission to the buyer over said network; and

delivery control means for controlling the delivery of the product, said delivery control means delivering the product from the vendor to the buyer when the desired delivery period or the required delivery period has elapsed from the transmission,

wherein said client computer comprises:

Appln. No. Serial No. **09/808,830**

18. (Currently amended) A digital contents transmission method for transmitting digital contents representing an entity of a product over a network, said digital transmission method comprising the steps of:

providing, by a product vendor, a plurality of products for browsing over the network;
selecting, by a product buyer, a desired product from a plurality of browsed products,
~~and specifying a desired contents-availability delivery period for the product item, and ;~~
~~_____ placing an order, by the buyer, for the selected product over the network;~~
incorporating, by the vendor, the digital contents representing content of the ordered product into a control program controlling the digital contents ~~and ;~~
~~_____ transmitting the control program to a computer the buyer over the network in~~
~~response to the order, thereby allowing use of the digital contents via the computer said~~
~~digital contents representing the entity of the product ordered by said buyer; and~~
disabling erasing, by said control program, the digital contents when ~~a the~~ contents
availability period has elapsed, said contents availability period being set to be longer than
said delivery period in said control program, thereby terminating the use of the digital
contents.
